Introduction

- As a dedicated and proficient PHP and Laravel Developer, I have successfully created a backend project using PHP, complete CRUD functionality and API management. I self-taught the basics of Laravel and MySQL, and also acquired knowledge on configuring production-grade environments.
- I have contributed to a real-life project by managing all its backends using PHP and Laravel. It provided me with an opportunity to collaborate with experienced seniors and enhanced my teamwork skills.
- I have experience working on multiple backend development projects, demonstrating proficiency in core technologies such as PHP and various libraries including Laravel and Bootstrap.

Skills & Abilities

· Web Development	· Core PHP
· Laravel	· MySQL
· GitHub	· Figma

Experience

Trading firm, Gujrat, Pakistan (sep 2023 – Nov 2023)

I created a Software for a Trading Firm, where I contributed significantly to backend development using PHP and Laravel framework. My responsibilities included developing web applications, API integrations, and database management. I also conducted code reviews and collaborated with the team to deliver high-quality projects.
